DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1 line 11, "second panel" is not clear from the claims since the claims have defined a first and last panel. Examiner suggests changing "second" to -last---.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 6, 9, 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herrin (#5,782,732). Herrin shows the method and apparatus comprising a conveyor for feeding blanks, a plurality of plows for folding, adhesive applicators 61, 66 for spraying adhesive, separating bar means 70, and alignment means 71, 73 which are pivotally mounted to conveying means 75 for aligning the front and rear panels as claimed. Herrin also shows compressing means 100 but shows compressing belt

Art Unit: 3721

means and not rollers. The examiner takes official notice that it is well known in the art to use rollers and belts interchangeably for compressing workpieces. Regarding claim 9, the examiner takes official notice that it is well known in the art to use reciprocating cylinders.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 8, 10-12, 14-17 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Herrin. Herrin shows the method and apparatus as discussed supra. Herrin shows the alignment means reading on conveyor means 75 in combination with pivoting means 71, 73 that align the front and rear panels as claimed.

Claim Rejections - 35 USC § 103

5. Claims 4, 5, 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herrin in view of Gambetti (#6,622,461). Herrin does not show the alignment means with adjustable cleats as claimed. Gambetti teaches the concept of having adjustable cleats on upper conveyors as shown in figure 2a which mate in speed with lower conveyors. It would have been obvious to one of ordinary skill in the art at the time of the invention to substitute the alignment means of Herrin with the alignment conveyor means with cleats as taught by Gambetti to provide for more precision in the alignment

Art Unit: 3721

process. Examiner notes that applicant is claiming various embodiments for the alignment means which suggests obvious modifications for the alignment means wherein the different means are mechanical equivalents of one another.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
